

## REMARKS

The Examiner has rejected all claims based upon the Lane Patent us 5,432,687 and the Urquhart Patent US 3,645,595. The claims have been substantially revised to overcome any possible objection. Both the Lane Patent and the Urquhart Patent pertain to horizontally mounted devices. Neither Patent hints at a device which can be mounted both vertically and horizontally as is claimed by Applicant. Applicant achieves reversibility of the paper roll which is now specifically claimed and which is not shown in either cited patent. Actually Urquhart does not show a slot in the wide end panel but does feed paper from adjacent the wide end panel.

The claims as now amended cover a reversible memo device not shown in the art and an early notice of allowance is requested.

This amendment corrects an earlier amendment which was rejected due to the form of the amendment. Every effort has been made to overcome these objections.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "John Maier, III", with a long, sweeping horizontal line extending to the right.
